### Direct Quotes from Clients and Other Interpreters:

“I am so glad you were interpreting instead of me. I could never have done it as well as you did! That was so fast, and so intensely technical. Also, there was a lot of stress.” – From an additional interpreter hired to check the accuracy of my interpretation in a patent deposition

“It was a real pleasure working with you. It’s really not every day we work with someone so competent and professional. And your skills were very, very good. We’re glad we were able to get done today. Everyone was happy.” – Lawyers, on the way out of meeting

“Where in Germany do you come from? Because you certainly don’t come from America!” – German scientist

“That was so fast and easy! You saved me hours of work.” – Scientist, client

“What is special about you is that you give the emotion of what is being said, not just the meaning. You laugh. People can hear your smile. Some interpreters talk like robots. It makes it very nice to listen to you interpret.” – Doris Ganser, booth partner, founding member ATA (American Translator’s Association)

“No, you do it! I only go into German, not into English!” – Booth partner during post-lecture audience Q&A session

“That’s why we hired you- we expected this to be a project of extremely technical nature and high pressure. We decided we needed a high-level interpreter with conference experience. We’re glad everything was so successful.” – Agency Project Manager after successful completion of project

“We requested you by name. Things went so smoothly before that I didn’t want them to send anyone else.” – Video conference Lecturing Doctor

“You were very professional and friendly. Really great job! Some of that was difficult material.” – JPL scientist

“If I ever need an interpreter again, I hope I get you!” – Interpreting client
